

CONVEYOR COMPONENTS

Durogrip® Rubber Grippers

With Durogrip® rubber conveyor grippers, production lines will spend more time operational and generating money and less time down with maintenance replacing worn-out parts. TSE Industries' rubber conveyor grippers are reinforced with a proprietary, high-aspect-ratio mineral composition that makes them extremely tough and highly tear resistant. Used as part of a chain system, these grippers help to grasp and firmly hold products in a conveyor. Grippers are available in a number of profiles and lengths.

FEATURES

- ✓ High Cut Resistance
- ✓ High Abrasion Resistance
- ✓ Good Compression Set
- ✓ Excellent Heat Resistance
- ✓ Increased Tear Strength
- ✓ Increased Tensile Strength
- ✓ Uniform Pressure Distribution
- ✓ Minimal Adjustment Requirements
- ✓ Aqueous Cleaning Fluid Resistant
- ✓ Disinfecting Fluid Resistant
- ✓ Peracetic Acid Resistant

MATERIALS

- ✓ Neoprene
- ✓ EPDM Rubber
- ✓ Nitrile
- ✓ Millathane® Millable Urethane
- ✓ Natural Rubber

OPTIONS

- ✓ Hardness range from 35 to 70 (+/-5) Shore A (Durometer)
- ✓ Formulations can be made for extrusion or injection molding
- ✓ Standard lengths from 1" to 3-3/8" with custom lengths available
- ✓ Available in FDA compliant versions

COLORS

Black

White

Blue

Black and White available in all materials.
Blue in Neoprene, Nitrile, EPDM.
Additional colors available on request.
